Offering the sound and touch of a fine acoustic piano at a fraction of the cost, these two new Roland ep pianos will thrill any beginner to advanced player. Both are compact instruments, easy to move from one room to another, never need to be tuned and come complete with their own built-in amplifier and speakers!

Both models have 88-keys velocity sensitive with 8 of the highest quality sounds to choose from including pianos, electric piano, vibraphone, organ, strings, and choir (plus 241 other sounds and 9 drum sets selectable via midi). They really sound and play wonderfully. Digital effects are built-in to add stereo depth and concert-hall ambience. A built-in recorder records and plays back up to 1000 notes so you can hear what you just played or play a duet with yourself etc...ideal for teachers.

Just choose one of the 11 on-board 'Pianist Styles' to play along with, or just play it normally...if it's too loud you can turn it down or play on some head-phones so no-one will hear you playing...it even has a built-in metronome to assist you with your timing while learning.

Introducing GENZ•BENZ Loudspeakers...USA made and sold to you at factory-direct, wholesale price!

It's not widely known, but around 90% of USA made guitar, bass and PA loudspeaker cabinets use exactly the same speakers; they're all USA made Super Eminence speakers with different brand names stuck on the magnets. The differences in sound quality and performance almost always depend on how the boxes are designed and how well they're made. The differences in price depend on how many middle-men there are between the factory in the USA and the customer in Australia. Usually, the most costly things about very expensive loudspeakers are executive salaries and their lifestyles.

But with GENZ•BENZ we went to the source...Mr. Jeff Gendler, Jeff is a superb speaker designer - he designs and makes his own GENZ•BENZ boxes as well as designing and making for other well-known companies...and these are FANTASTIC sounding cabinets. His design gives strong clean bottoms (something he is extra interested in) plus clean bright top-end response. Direct from the factory and then sold on to you the prices are amazing, often cheaper than you'd pay for beaten-up, no-warranty 2nd hand brand name cabinets. If you're looking for the best speaker you can buy for your money in Australia today, then you must check out GENZ•BENZ.

'LTP' Speaker Protection inside all boxes!

All GENZ•BENZ crossovers carry LTP speaker protection which means your speakers are protected against harmful and severe voltage spikes.

3 year Aussie Wide Transferable Warranty!

Yes, you get a HUGE 3 year transferable warranty that is Aussie wide, not that you'll need it, these boxes are practically bullet-proof.

10-day money-back, Aussie-wide, Satisfaction Guarantee!

You can buy from anywhere in Australia with complete confidence because we give you a money-back satisfaction guarantee. Test out these speakers live at your place...for 10-days & nights. If you're not 100% happy with them, we'll take them back and refund you the cost of the goods.

Model C1S \$650

Model B \$699

Handmade Classical Models

Chosen carefully from the world's finest timbers all the wood used to construct even in the \$699 model is aged impeccably to ensure the highest quality sound. Because of their weight, hardness, stiffness and beautiful colour rosewood and cypress are selected for the backs and sides. Indian rosewood is particularly important for the tone-rich exquisite sound required for a concert quality classical guitar. Only Cedar or German Spruce is used for the tops. Cedar delivers that unique explosive power of sound that makes Spanish made guitars the three-giants they are. Spruce is often preferred by some for it's tonal complexity. Prices listed do not include cases. Quality trade-ins considered.
